Add the following claim

B2
--23. (new) A method of treating inflammatory and/or desquamating skin disorders associated with Malassezia spp comprising applying the composition of Claim 1 to the skin or scalp of a person in need of said treatment.--

REMARKS

Reconsideration is requested.

Claims 1-13 and 18-22, are pending. Upon entry of the above amendments, claims 1-13 and 18-23 will be pending. Entry of the above amendment is requested. The claims have been amended to advance prosecution by placing the claims in condition for allowance. Entry of the amendments is requested. The applicants note an additional dependent claim has been added, based on the disclosure at the top of page 6 of the specification, without canceling a corresponding claim. This claim, which is dependent on claim 1, is not believed to raise new
